**ADDENDUM TO COMMENTS FILED BY THE
VULTURE PEAK RESTORATION GROUP**

On May 21, 1993, the Vulture Peak Restoration Group ("Vulture Peak Group") filed Comments in the above-captioned proceeding. The purpose of the instant Addendum is to correct and clarify a matter contained in those Comments, as follows:

On pages 4 and 8 of the Comments, mention is made of the condition imposed by the Board of Supervisors, Maricopa County, that before a "special use" permit could be granted for Petitioner's 499 ft. tower, an archeological survey of the site was required to be conducted by a qualified archeologist and a report summarizing those findings was required to be submitted "to the State Historic Preservation Officer" who was to confirm that such a report had been received. The Vulture Peak Group stated at page 8 of the Comments that "we are unaware that any such study was ever made," having made inquiry with the State Historic Preservation Officer, but not (at the time of the

preparation of the Comments) having been able to obtain further verification as to the circumstances of the report. Since the filing of the Comments, a representative of the Group has investigated this matter further and, in fairness to Petitioner (and so that the record at the FCC will be complete and accurate), wishes to report that in this case although a specific on-site inspection was not made by Petitioners, nevertheless, a specific on-site inspection and report did not appear to be necessary. Further checking

reveals that when the State of Indiana makes state land

Group no longer contends that the required archeological inspection condition may have been unmet.

Respectfully submitted,

VULTURE PEAK RESTORATION GROUP
